

CORTROL 1.30.1 Release Notes

June 1, 2025

This is a maintenance version. Change log:

Improvements:

- Added Client setting: turn off DPTZ when returning from the maximized view
- Improved search in Console: use quotes to search for multiple words at once
- Added ONVIF-based drivers for Axis and Pelco Fisheye models

Support for new cameras added:

- Mobotix Mx-MD1A-5-IR, Mx-VT1A-5-IR, Mx-VH1A-12-IR-VA, Mx-VD3A-2-IR-VA, SD2A-230-LL-VA, Mx-VMSD1A2021VA models
- IMC IMC3/T/5/VF/s40, IMC3/B/5/VF/s40, IMC1/Bi/8/2.8, IMC1/P/5x/50, SN-IPV8088ECAR-B1.8-13 models
- Axis Q6135-LE and AXIS P1465-LE models
- Zycoo SH10 speaker

Fixes:

- Fixed Microsoft certificate expiration issue for OAuth2
- Fixed issues with the RTSP server: gaps occurring during long-term work without a restart
- Fixed an issue where the TOA speaker randomly stopped sending audio data after some time
- Fixed the issue with receiving events for VCACore devices using the new firmware version 2.3.0
- Fixed an issue in the Ukrainian localization during emulator setup
- Client: The position of the label for Video overlays may calculate incorrectly when displayed in a small viewport
- Console: Icons added to the map without being linked to a resource may be deleted when upgrading to version 1.30.0

- Console: Replication channels write a 'Video lost' event to the audit after the server restart
- Console: Fixed Auto-refresh interval settings (version 1.30.0 was affected)
