

CORTROL 1.33.1 Release Notes

July 15, 2026

This is a maintenance version. Change log:

Improvements:

- Improved PTZ operation with the ONVIF driver
- Improved alarms filtering in Client when connected to multiple servers
- Improved Streaming Server (HTTP API) handling of MxPEG streams

Fixes:

- Fixed photo upload in the Active Guard OSS plugin integration
- The Client application may hang when entering the cloud server connection token
- Fixed the logic for saving negative values in the 'Value' field of Modbus device events
